Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

CLAIMS 14-17 ARE PRESENTED FOR EXAMINATION

The response filed May 18, 2004 have been entered in the file and the Declaration of Brian R. Walker and Jonathan R. Seckl has been carefully considered. In view of this, as it relates to the claims of the subject application, the rejection under 35 U.S.C. §112 is withdrawn.

Applicants' response refers to U.S. Patent No. 6,51,267 which is believed to be incorrect. The Patent which corresponds to Serial Number 09/029,535 is 6,368,816.

DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Gomez-Sanchez et al. (Hereinafter referred to as HS).

HS teaches at page E1126 the administration of carbenoxolone will increase blood pressure. Applicants are to be read in their broadest reasonable interpretation. In re Hyatt, 211 F.3d 1367, 54 USPQ2d 1664 (Fed Cir. 2000).

The applicants' claims 14-17 read on the inhibition of a physiological pathway. Therefore, the administration of carbenoxolone as taught by HS would inherently inhibit reductase activity of 11-Beta-hydroxysteroid dehydrogenase 1.

That applicant may have determined a pathway by which the active ingredient gives the pharmacological effect does not alter the fact that the compound has been

previously used to obtain the same pharmacological effects which would result from the claimed method. The patient, condition to be treated and the effect are the same. An explanation of why that effect occurs does not make novel or even unobvious the treatment of the conditions encompassed by the claims.

The citation of Shanbrom in Form 892 illustrates other uses of on of the uses of carbenoxolone. At column 6, lines 49-51 it is disclosed that carbenoxolone is a potent ulcer-healing drug.

None of the claims are allowed.
